Read what these Alberta Farmers say about their

Hart-Parr Tractors

Warner, Alta.
Jan. 29, 1929.

"Referring to Hart-Parr 15-30 engine purchased spring of 1927, will say it has given exceptional service the past two years. Last spring we double seeded some 1100 acres, hauling 18 ft. extra heavy tandem discs set full depth, on a full consumption of one-half gallon to an acre. Also pulled four bottom 14 inch gang in summer fallow six to eight inches deep on two gallons.

"During the past two falls we pulled a 28-40 Minneapolis separator averaging 2000 bushels in 1927 and 1800 bushels in 1928, per day throughout the run on approximately 35 gallons distillate which is our regular fuel. Our land is quite rolling and requires power to climb hills at times but it is very seldom we have to resort to low to make any of them.

"I have used different makes of tractors since 1912 continually and Hart-Parr suits me best of any in the fundamental points of reserve power, accessibility, endurance, economy of both fuel and oil and dependability. Our only delay in the two years was caused by a flawed fan. We used the power take-off on our power binder last fall and it sure made a fine outfit out to through where horse drawn machines were continually plugging up.

"It also pulled three 14 inch breaking bottoms in heavy breaking 14 to 16 inches deep on three gallons of distillate per acre on low gear with ease.

Wishing you continued success, I am
George W. Holroyd"

Imhofree, Alta.
Jan. 25, 1929.

"Only a few lines about the Hart-Parr Tractor. I got my Hart-Parr last year and like it very much. I had the first one for one year and never spent five cents for repairs yet. I know we have several makes of good tractors, but I also know that Hart-Parr leads in being easy and simple to operate, very economical in fuel and on repairs. If all farm machinery would give us a little trouble as the Hart-Parr the farmers would be well off."

Eschant, Alta.

"How do I like my engine? I have used the engine 50 days on a 28 inch separator in every kind of weather and condition of grain even threshing at 16 below zero in 15 inches of snow, and have had no trouble of any kind, with plenty of power and to spare at all times.

C. G. Koester.

O'Connor of Kindersley Wins Grand Challenge Second Consecutive Time

Alf Gibson Wins Citizens Event. Whitlock Rink only one to get into "jewellery" in both Events.

Consolation series run off Saturday on tough ice. Langmuir and Dunford reach finals, with the latter winning a game of hard heading.

Oyen's tenth annual bonspiel passed into history, Saturday night. The two open events were concluded on Friday evening when O'Connor of Kindersley and McLeod of Youngstown battled for the gold watches, presented by H. J. Cooper, and Alf Gibson and Whitlock locked horns in the final game of the Citizens event. The first named of each pair were the victors.

A consolation series was arranged for the local rinks which did not arrive in the "jewellery" in the main events. Games in this competition were played off Saturday, in mild weather and on tough ice. By afternoon it became a matter of who could heave the rocks the hardest.

Charts showing the play in each competition will be found on another page.

While the final game of the consolation series was being played off on Saturday night, the final game of the "mixed"spiel was settled on the other sheet of ice, when Marshall defeated Kerr. The personnel of these rinks was: Mrs. Hans Peterson, J. P. Rorabeck, Mrs. A. Johnson and Jim Marshall, skip; and Miss M. Heath, Bob Nisbet, Miss W. Love and J. P. Kerr, skip.

Respected Old Timer Leaves Tonight For His Home in Scotland

Mr. Thomas Storror of Excel, who recently sold his farm and equipment to Pete Kishereck, is leaving to night for Saskatoon, en route to his home in Slaman, Scotland. He will sail from New York for Glasgow on Saturday, March 23.

Mr. Storror first came to Canada in 1907, when he homesteaded near Plunkett, Sask. In 1912 he came to this district and took up a purchased homestead, which he successfully farmed during his 16 year's residence here.

Since first coming to this country Mr. Storror has twice visited his home in Scotland, and now he is leaving for good, with the best wishes of his many friends in this district.

The Interim Pool Payment

Canada's Financial Position

The financial position of the Dominion of Canada, as revealed by Hon. J. A. Robb, in the budget presented by him to the House of Commons on March 1, is such as to be the source of great satisfaction to all citizens, because, irrespective of party affiliations, every Canadian is intensely interested in the allied subjects of Dominion finances and taxation.

During the war Canada piled up a huge debt for a nation of less than ten million people. The people assumed the heavy burden without grumbling, knowing it to be absolutely necessary, and a price that must be paid to safeguard the liberties of the world, including their own. As war expenditures enormously increased and the debt piled up, it, of course, became necessary to impose much new and heavier taxation, not only to keep the debt as low as possible, but in order to meet heavy annual interest payments upon that debt.

Ever after victory was won it was necessary to still further increase the debt in order to bring our armies home from Europe, re-establish the war in civilian life, and make provision for huge sums to be paid annually in pensions. Therefore, for some years the debt continued to increase and heavy taxation to be imposed. At one time it almost seemed that, instead of the debt being decreased, it would go on increasing from year to year.

Recent budgets, however, have shown a different trend, and not more so than that of March 1, last. After meeting all expenditures on both current and capital account, Canada registers in a surplus of \$700,000,000, the largest ever recorded since Confederation. And this surplus for 1928-29 follows on the heels of a surplus of \$67,000,000 in the preceding year. The net result is that as loans mature the Finance Minister is in the happy position of being able to pay them off in cash and not forced to borrow by refunding loans. In other words, the debt is being steadily, even rapidly, reduced. In the fiscal year now closing, Mr. Robb paid off \$33,000,000, and he has cash in hand to pay off another \$800,000,000 which falls due next August. Thus in two years \$880,000,000 is paid off the national debt, and about \$6,000,000 a year in interest.

Mr. Robb pointed out that seven years ago, on April 1, 1921, the annual interest charge on the public debt amounted to \$132,542,113, whereas on April 1, 1928, the annual charge would be \$117,142,113, a decrease of \$15,400,000.

This very gratifying reduction has been brought about, not by increasing taxation, but, on the contrary, in the face of a steady lessening of that burden. For example, the sales tax, which a few years ago was six per cent, is now only two per cent; the rate of postage has been reduced from three to two cents; the size of income earned from taxation has been increased, and the rates of income tax have been reduced; stamp taxes on receipts abolished and on cheques largely reduced; numerous reductions in customs tariff schedules have been made, and now taxes on telegrams, cinema insurance policies, railway and steamship tickets are to go.

It is not possible, of course, to remove taxation as rapidly as it was imposed during the war years, but every year sees some advance in the right direction made. And such reduction has had a beneficial effect on the business of the country with the result that the lower rates have brought in revenues only slightly smaller.

Reduction in taxation has been made possible through three main causes. First, the ease exercised by Mr. Robb over all expenditures which has insisted be kept down to the lowest possible point consistent with efficiency and the expanding needs of the country. Economy has been enforced to the point where development of the country was checked, but expenditures on non-productive services have been kept to a minimum. Second, whereas in 1920, 1921 and 1922, the Canadian National Railways were operated at a deficit amounting in these three years to no less than \$116,000,000, in the year just closed, the C.N.R. not only paid all operating expenses, all interest on bonds and debentures held by the public, but accumulated a cash surplus of \$60,000,000. Third, the substantial increase in the trade and commerce of Canada, assisted by reductions in taxation, and the marked development in all branches of industry, has brought larger revenues to the Government.

And the bright, promising feature of the situation is that all indications point to a continued expansion of the country's conditions throughout the next fiscal year so that the people of Canada can look forward with a large degree of confidence to next year's Budget disclosing another large reduction in the national debt and still further decreases in taxation.

For Influenza

The Liniment That Relieves All Ailments

Highest Timber Line
The highest known timber line is on Mt. Orizaba, in Mexico—14,000 feet above sea level. On the Alps, the Himalayas and Rocky Mountains the trees average somewhat over 10,000 feet toward the mountain tops. The trees at this height are supposed to be little more than mangled, wind-blown bushes.

New Land Under Cultivation

Extensive Areas in Western Canada Are Annually Taken Up

Additional extensive areas are annually brought under farm cultivation in Western Canada. Last year it was estimated a total close to 2,900,000 acres of Canadian Government free homestead lands were taken up by settlers in the four Western Provinces; a total of 15,596 homesteads being filed upon, each of 160 acres, completed with 6,537 in 1927.

There is now one motor vehicle for every 21 of the population of Great Britain.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Without Comment

A California authoress sent a manuscript to Ambrose Bierce, with the request that he give her a criticism in one sentence, and drop further comment. "Something was bound to drop all up and down the Pacific coast when he replied: "The covers of your book are too far apart."

Not only does the girl in some districts of Indo-China make the product, but with her also lies the initiative for divorce.

No Waste Of Time

Investigating Breathing Of Bess Discloses Interesting Facts About Health

To spend time investigating the question of the best breathing apparatus, when the best is so close at hand, is to waste time. In the summer, the breathing is an index to other interesting facts about the body. Professor G. H. Vane, of the University of California, rigged an apparatus by which he could measure carbon dioxide and the amount of vapor given off by a colony of bees in both winter and summer.

Sore Corns Drop Off If You USE "Putnam's"

Predicts Library Of

Aerial Photographs
May Be Created Within Ten Years

The creation of a library of one million aerial photographs within the next 10 years to constitute a reference inventory of Canada's natural resources was predicted by President J. W. Pierce, D.L.S., at the annual convention of Dominion Land Surveyors at Ottawa when he said that about 250,000 aerial photographs covering areas from coast to coast had been assembled by the time of the next year under the Topographical Survey of Canada, Department of the Interior.

BABY'S OWN TABLETS

WIN GREAT PRIZE

Many Mothers Always Keep

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a safeguard against childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy.

Concerning the use of the Tablets Mrs. Donald Pendergast, Tingle, Okla., writes: "I have nothing but praise for Baby's Own Tablets. They are the best medicine I have ever given my two little ones and I am glad to state that they have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house." Baby's Own Tablets are a mild but effective laxative, relieve the bowels, ease the stomach and relieve constipation, without any harsh action; break up colds and simple fever and make the cutting of teeth less painful. The Tablets are absolutely safe, being guaranteed free from all irritating drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Our Natural Resources

Wonderful National Heritage Of Untold Wealth Awaiting Development

The natural resources of Alberta are an immense treasure trove. Great industries will some day grow up in the Canadian west. Coal, oil, minerals, lumber, water power, as well as rich agricultural land await the coming of capital and organizing ability to open the Aladdin's cave of untapped natural resources. In the west, before the end of this present century, agriculture may itself have been transformed into something like a manufacturing industry operated largely by industrial chemistry. In the meanwhile, there is any amount of work ahead of the provinces to make the most productive use of the resources which the Dominion government are handing over as part of the west's share of a wonderful natural heritage—Ottawa Citizens.

George Washington's second inaugural address contained 143 words, and is regarded as the shortest in the history of such occasions in the United States.

Western Canada Air Mail

Vote In Parliament Foresees Important Development

The main estimate tabled in parliament, almost certainly foreboding the establishment this year of an air mail service in western Canada, fearing in mind the probable cost of the Winnipeg-Calgary air mail service, the increases in the appropriations to be sought by the post office department and the national defence department can be interpreted in no other way than as foreboding this most important development.

The vote on the air mail service in the estimates of the post office department is increased from \$100,000 to \$1,250,000 and this is more than sufficient to cover all contracts needed in the new service, likewise the increase in the vote for the establishment of air routes, in the defence department, of \$13,142, is about twice the amount required to construct light beacons and emergency landing fields along the 1200 route connecting the coast of British Columbia and north from Regina to Saskatoon, and from Calgary to Edmonton.

Other respects the main estimate is of great interest to the west. The items for the department of agriculture show very substantial increases. There is an increase of \$137,000 for cold storage warehouses, \$250,000 for seed grain control and grants to seed farms, \$150,000 for experiments and \$180,000 for health or animals. \$200,000 to establish a co-operative branch in the department of health for 60 per cent of Canada's share in the newly organized empire bureau of research.

Where Living Is Cheap

Pik Islanders Work Little and Pay No Rent

Pik Islanders have a pretty easy time. Little work and no rent to pay. The placid life of the Islanders brightens the heavy reading of the annual colonial report for 1927, which has just been issued by the British government.

"Labor conditions do not exercise any considerable influence on the Pikians as a whole," declares the report, "apart from affording additional material amenities. Every Pikian is the owner of a house, constructed of mud and thatched with palm leaves. He has the right to use a portion of the tribal lands for planting crops for food and profit, or for raising cattle, if he remains in his village. He is provided with a house of native construction, built by the community of which he is a member. Beyond performing his share of the work done for his benefit by the community as a whole, he pays no rent either for his land or his house."

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Broussard, Maple, Que., writes:—"For many years I suffered with shortness of breath, then four years ago I had palpitation of the heart, and was so bad I had to sit down or lie down when going upstairs. I read about

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since.

Price 50c. a box at all druggists and dealers or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

His Worry

"I hear you are going to California to see your husband, Jane," said Mrs. Jones to her maid, who was leaving to get married. "Aren't you nervous about the long voyage?" "With money," was Jane's reply, "that's his lookout. I belong to him now, and if anything happens to me it'll be his loss, not mine."

Village Fire Marshal—"I was just reading in this history about the burning of Rome."

Head Pipeman—"What started it, chief? crossed wires or a lighted cigarette?"

Has Met With Success

Marshall Stillman Movement in States Helps Discharged Convicts To Reform

Possibly few persons could say off-hand what the Marshall Stillman Movement is, and yet it is grappling with, and greatly aiding in the solution of, one of the most pressing social problems in the United States, that of taking care of the convict on his discharge. It strives to catch the former convict just as he leaves prison in a mood of uprightness and to give that mood an opportunity to express itself. Its "clubs" have figured as perhaps the most important feature of its work until recently, but during the last year the question of jobs for its wards has been answered more successfully than ever before by the establishment of enterprises where former convicts alone are employed. The plan has succeeded beyond expectation, and to date, has to its credit a 100 per cent. record of achievement; that is, there have been no backsliders.

Society has in the past been responsible for many first-time offenders becoming habitual criminals. This movement is an effort to enable the former convict to desire to do as well as to be able to do so. It really is straight out. — Chicago Science Monitor.

Buffalo Shipped To Italy

Three buffaloes from the government park at Watlington, have been sent to Italy, where they will be placed in one of the state parks. Prior to their long journey overseas they were segregated for three weeks, during which time they underwent a taming process. The animals were shipped to the Royal Italian Government.

YOU CAN'T DYE with Good Intentions

You can get results—after a fashion—when you dye with good intentions. That's why we put them in Diamond Dyes. They come from three times more dye on the market. Cost more to make! Surely, that you get them for the same price as other dyes.

Next time you want to dye, try them. See how easy it is to use them. Then compare the results. Note the difference of that red-dyed look of straining or spotting. See that they take the life out of the cloth. Observe how the colors keep their brilliance through wear and washing. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye red, blue, green, yellow, orange, or any mixture of materials. The blue package is a special dye for silk or wool only. With it you can dye your valuable articles of silk or wool with results that are far greater than those of any other dye you buy. The blue package dyes silk or wool only. The white package dyes any kind of material. Your dealer has both packages.

WOULD BAR U.S. FARM PRODUCTS FROM CANADA

Ottawa.—Parliament received a suggestion as to how Canada can meet increased United States tariff against Canadian farm products.

The method, suggested by Hon. Hugh Guthrie, acting Conservative leader, would be in the first instance, to stop the importation of farm products into Canada.

Secondly, to supply those agricultural products which are now imported into the Dominion from Canadian farms.

Mr. Guthrie, in making this suggestion to the government, stated that the Dominion is now importing agricultural products from the United States to an annual value of approximately \$60,000,000. To the United States, he said, Canada sells annually farm products valued at slightly over this sum. If the United States closes its doors on Canadian agricultural products, Canada could export to the United States similar products from the world. The Dominion is in a position to supply her own home needs.

"To accomplish this," declared Mr. Guthrie, "all we need is a government with some courage; all we need is a government with the resolution; all we need is a government that has the real interests of the people, of the farmers of Canada, at heart."

The acting Conservative leader submitted to the house that "there is something seriously wrong in regard to the trade of this country with the United States." The Dominion was now buying too much from the country to which it was selling too little. Canada found herself with an adverse trade balance, insofar as her transactions with the United States were concerned. The Dominion was now importing from the United States to the value of \$60,000,000, Mr. Guthrie said, he realized that the United States market was the most important to Canada, and in many respects the very best market in which to sell Canadian farm products.

"But," he added, "if the tariff of that country is raised so high that we cannot enjoy that market, then we will have to shape ourselves to enjoy the Canadian market for the present, content and at the same time to seek other markets throughout the world. In order to do this, we will have to have a fair application of the principle of protection in our customs tariff."

Receives Medal From King

Royal Cross insignia personally conferred on one of the five men. Bogner, England—King George personally conferred the insignia of the Royal Red Cross, second class, on Nurse Davis, one of the five who attended him during his illness.

His Majesty had the medal of the Royal Red Cross, second class, on Nurse Davis, one of the five who attended him during his illness.

Attempt To Salvage Plane

Copenhagen.—Four members of the Hobbs expedition in Greenland have left Mount Evans, Greenland, on an attempt to salvage the aeroplane of Bert Haas and Parker Cramer. The plane came down last summer 12 days' walking distance from Mount Evans, where the Hobbs' expedition is wintering. Word of the salvage attempt was radioed to the newspaper Ekstra Bladet.

Bank Receives Charter

Ottawa.—Approval has been given by the banking and commerce committee of the House of Commons to the charter application of Barclay's Bank (Canada, Limited). The headquarters of the bank, which is capitalized at \$500,000, will be in Montreal. Sir R. L. Borden, former premier of Canada, will head the institution.

A Record Production

Ottawa, Ont.—Mineral production in Canada reached a net record in 1928 with a total of \$273,446,864. This surpasses the 1927 figures by \$25,000,000 or 10.5 per cent. Advantages were general in all fields; metals, non-metals, fuels and structural materials. Figures were made available at the Dominion bureau of statistics.

May Enable Women To Keep Nationality

Bill Introduced In British House Regarding Marriage With Aliens

London, England.—A bill to enable a British woman marrying a foreigner to retain her nationality unless she declares her desire to assume the nationality of her husband was introduced in the House of Commons by Miss Ellen Wilkinson, Labour member for Middleborough East. The bill is only retroactive with regard to British women who have married aliens and they would automatically become British citizens again unless they declare their wish to retain the nationality of their husbands.

Master Mariner Dies

Captain William Sanderson Came To Vancouver In The Eighties

Vancouver.—Death of Captain William Sanderson, pioneer Canadian Pacific Railway company master mariner, has broken a link between the present and an earlier shipping era on the Pacific Coast. Captain Sanderson, when naval services were held in Vancouver, was a native of Liverpool, and came to Vancouver in the 80's, a boatswain on the "Empress of India," on the liner's maiden voyage. He remained in the employ of the Canadian Pacific here until his retirement some years ago.

Prince Given Power To Invest Knights

Will Conduct Two Ceremonies On Behalf Of King This Month

London, England.—The King by royal warrant has authorized the issue of letters patent empowering the Prince of Wales to confer the honor of knighthood at royal investiture ceremonies at St. James' Palace, March 26.

The Prince of Wales has been empowered to conduct two investiture ceremonies on behalf King George at St. James' Palace on March 26 and 27.

Farm Loans For B.C.

Loans May Be Made Available For Agriculture By End Of May

Vancouver.—Farm loans should be available to British Columbia agricultural producers by May 1, according to an announcement given out here by Dr. J. D. MacLean, chairman of the British Columbia Farm Loans Board. The chairman of the board stated that nominations for places on the provincial loan board had been made by the provincial government and will be considered by him and his colleagues immediately. The names of the provincial members are yet to be revealed.

World Retain Dole

London, England.—The House of Commons to a bill which makes migrants from Britain still entitled to unemployment insurance benefits. The bill provides that a migrant who goes overseas but remains within the Empire, should receive unemployment payment for a period up to two years.

Accepts Radio Agreement

Ottawa.—Word has been received by Alex Johnston, deputy minister of marine, that Newfoundland has accepted the radio agreement concluded by Canada, the United States, Newfoundland and Cuba, covering the short wave, Cuba and Mexico have yet to be heard from.

Appeal Is Dismissed

Toronto.—The appeal of Arvo Vaaro, editor of Vapori, Finnish newspaper published at Sudbury, from a conviction in that city on a charge of publishing seditious libel, was dismissed in second division court.

Ex-President Will Write

New York.—Curiosity as to what Calvin Coolidge would do on returning to private life was at least partially satisfied by announcements that Coolidge would write his pen would appear in two magazines.

Celebrates Birthday

Toronto.—Toronto celebrated its 90th birthday, March 6, having been incorporated as a city by act of the legislature, which received royal assent March 6, 1834. In 1834, Toronto had a population of 9,254.

France Ban Trotsky

Paris.—It was learned here that the French cabinet, at a secret meeting, has agreed to grant an application from Leon Trotsky, for permission to reside in France.

Opposes Intervention

Premier Baldwin Against Direct Governmental Intervention In Mining Industry

London, England.—Direct governmental intervention in the mining industry would not be advantageous, Premier Baldwin said, a deputation from the Miners' Federation, according to the joint report of the proposals at the meeting recently issued. Mr. Baldwin expressed the opinion that amalgamations and other forms of re-organization in the industry were progressing satisfactorily.

The most urgent matter requiring attention, he said, was the transference of the surplus miners to other industries. He appealed for the cooperation of the Miners' Federation with the government schemes in this matter.

To Ban Poison Gas

Germany Prepared To Sign Agreement Prohibiting Use Of Gas In Warfare

Geneva.—Germany, which introduced the horrors of poison gas on a large scale during the world war, has announced to the world that she is prepared to sign a protocol prohibiting the use of asphyxiating gas in warfare.

The announcement by Dr. Gustav Stresemann, German foreign minister, sent the regular March session of the League of Nations council off to an auspicious start in its efforts to bring about a world peace. Stresemann said Germany would ratify the protocol shortly. August 1918, Polish foreign minister, announced that Poland also would ratify the protocol.

RESOLUTION ON RESOURCES IS FINALLY ADOPTED

Ottawa.—After a stormy career, the Woodworth resolution on natural resources, in amended form, finally passed the House of Commons.

Debate on the resolution and on the numerous amendments which followed, the introduction of the resolution, held up consideration of the budget for several days.

The resolution finally emerged, after the huffing which it has received, in a very different form from that which its mover intended. As originally drafted and presented to the House by J. S. Woodworth, Labour member for Winnipeg North Centre, it set forth "that in the opinion of this House, no disposition of the natural resources, under the control of the federal government, shall be effective until ratified by Parliament."

The resolution as approved by Parliament, reads as follows: "That, in the opinion of this House, no further disposition of water powers under the control of the federal government in the provinces of Manitoba, Saskatchewan and Alberta, shall be made under the Dominion Water Power Act, until the said water powers shall be administered by the respective provinces under powers to be granted by that Parliament similar to the powers granted to the province of British Columbia to administer the water powers in the railway belt as set forth in the railway belt water act of 1912."

Eighteen racial groups will contribute to the Great-West Canadian folk-song collection and ballad festival which is to be held in Regina, March 20-23. Serbians will dance the Kola; Charles Marchand will lead the Baytown Troubadours in French Canadian folk-songs; Paul Bai, Danish balladist will render Viking songs; Jean and his pupils will represent Scotch and Welsh village songs. Who, looking at the picture above of Walter Youngberg and Lina Gaertner in the Dutch scene will think this move for the blending of national cultures other than worth while?

RECEIVES CONGRATULATIONS

Dr. Donald MacGillivray, Pioneer Missionary in China, who is receiving congratulations on the fortieth anniversary of his entrance into the Chinese mission fields.

Dr. Donald MacGillivray, pioneer missionary in China, who is receiving congratulations on the fortieth anniversary of his entrance into the Chinese mission fields.

Hoover Is Starting

Prohibition Drive

New President Plans To Clean Up National Capital

Toronto.—A special detachment to the Mail and Empire, from Washington.

"President Hoover will begin his prohibition enforcement drive in Washington. He will confer at an early date with the commissioners of the district of Columbia and urge them to clean up the national capital. Another step will be to appeal to all public officials to refrain from patronizing boot leggers and drinking. His drive here may result in stopping many hotels and banquets from serving drinks at dinners attended by public men and women.

During the Coolidge regime Washington entertainers gradually curtailed use of strong drink at parties, but Mr. Hoover will further discourage the custom."

Wins Dog Derby

St. Godard First To Cross Line In Northern Manitoba Chase

The Pae, Man.—In the most sensational sled dog race witnessed in any dog derby, Enrie St. Godard, youthful "master" of international fame, finished in the triumph of the sled dog derby association 20-mile sled dog derby.

St. Godard reached the finishing line on the Saskatchewan river at 1:00 p.m. His time for the 20-mile course to Film Film and return was 35 hours 59 minutes.

Earl Brydges, another local entrant, finished second, only three minutes behind the famous St. Godard, after fighting an uphill battle during the early hours of the night.

Killed By Avalanche

British Russia.—Thirty persons were killed and many injured in an avalanche in the Armenian village of Zangur, advised here recently by cable. Several houses were destroyed by the avalanche, which was reported by heavy snowstorms in the region.

Ice-Bound In Baltic Sea

Copenhagen.—Christian X, King of Denmark, Queen Alexandra and Prince Knud, arrived here after ice-bound the night aboard a ferry ice-bound in the Baltic Sea. The ship took twelve hours to make what ordinarily is a two-hour voyage from Warnemunde to Gjedser.

The Mexican government is causing more anxiety in Washington than any other since the Nicaraguan revolt. It is in high government circles state frankly that the revolt has a very good chance of overthrowing the Mexican government.

To Picture Score of Cultures

Eighteen racial groups will contribute to the Great-West Canadian folk-song collection and ballad festival which is to be held in Regina, March 20-23. Serbians will dance the Kola; Charles Marchand will lead the Baytown Troubadours in French Canadian folk-songs; Paul Bai, Danish balladist will render Viking songs; Jean and his pupils will represent Scotch and Welsh village songs. Who, looking at the picture above of Walter Youngberg and Lina Gaertner in the Dutch scene will think this move for the blending of national cultures other than worth while?

Compulsory Voting

Law Is Considered

Workings Of Australian Law Being Studied By Committee

Ottawa.—Compulsory voting has been under consideration by the special committee of the House of Commons which is dealing with amendments to the Dominion Elections Act and the Corrupt Practices Act. No decision as to the principle involved will be made until sections are drafted suitable to Canadian conditions. Kaiser, Conservative leader, Ontario, read to the committee the sections of the Australian act which he said was working satisfactorily. In the last election in that country 91 per cent. of voters on the lists had attended the polls as compared with 75 per cent. in the previous election. With the assistance of W. A. Boyd, Conservative, Simco, North, Dr. Kaiser to draft sections suitable for inclusion in the Dominion Elections Act.

Question Validity

Of Pension Law

Quebec Opinion Considers Federal Pension Act Ultra Vires

Quebec.—Legal opinions furnished to the premier of Quebec as to the federal old age pension law raised the constitutional question as to whether or not the Dominion government has power to use its money to pay to the provinces a part of the cost of a scheme as the old age pension law.

This is the information which Premier Taschereau gave the Quebec legislative assembly when debate was resumed on a motion for production of documents relating to the pension law.

Mr. Taschereau has consulted three constitutional authorities in the matter, Eugene Lafleur, K.C., James Geoffrey, K.C., and Louis St. Laurent, K.C. Mr. St. Laurent gave it as a definite opinion that the federal law is ultra vires, the premier said.

Seek Potash Deposits

In British Columbia

Prospectors Being Encouraged By Smelter Company At Trail

Victoria.—The Consolidated Mining and Smelting Company which seeks potash in its new fertilizer plant on which it is originally to a large scale at B.C., announced measures here for the encouragement of prospectors in the matter. Prospecting deposits believed to exist in British Columbia.

The Consolidated will make a free survey of the area for potash and to aid in the identification of samples, deposits are being placed on display here and in Vancouver. A booklet on potash and its occurrence will also be sent from Trail to anyone desiring it.

EARLY END OF MEXICAN REVOLT IS PREDICTED

Mexico City.—A speedy end of the rebellion against the administration of Provisional President Portias Oil was predicted in an official government bulletin recently.

The bulletin said that General Jesus Andrade, leader of the revolt at Vera Cruz, had been deserted by most of his soldiers, who had returned in support of the government and were fighting their former leader.

Announcement also was made that the federate had "re-captured" Monterey, the strategic center in Nuevo Leon, had taken Cordova, in the State of Vera Cruz, and would in a few days be in full possession of the Gulf port of that name.

Washington.—The Mexican government is causing more anxiety in Washington than any other since the Nicaraguan revolt. It is in high government circles state frankly that the revolt has a very good chance of overthrowing the Mexican government.

This might result in the United States having to undertake another expedition with marines into a Latin American country. The Nicaraguan expedition proved so unpopular with the average American that the government is not anxious to repeat it. But the protection of American nationals and their property in Mexico will be the first consideration.

PLANES ASSIST IN OPENING UP NORTH COUNTRY

Winnipeg.—The exploration of hundreds of thousands of miles of Canada's northlands for minerals, both by airplane and by waterways, with interesting details of the vast country traversed and the hardships encountered, was recently related by John E. Hammell, internationally-known mining man; George M. Smith, mining engineer, of Lakeland, Ont.; and L. B. Bolton, assistant deputy minister of mines, Ottawa.

These three men, eminent in the field of mineral development, addressed the afternoon session of the annual meeting of the Canadian Institute of Mining and Metallurgy.

The great part being played in the exploration and development of minerals by the airplane was testified to by Mr. Hammell, who is a director of the Northern Aerial Mining and Exploration Company. Planes of his organization had covered over a hundred thousand miles of flying from Ungava to the Yukon without a single mishap, he said.

There are four outstanding advantages of airplane travel, which he outlined as follows: Safety; rapid communication with field parties with district engineers; increased morale, because weary and labor weary men are able to return, and fourth, with aerial observation geological boundaries could be outlined by engineers and experienced prospectors.

Mr. Hammell dramatically told of the great future awaiting those bold men who are opening up the northlands. The rich mineral fields could be made, and of the possibilities afforded young Canadians in the northlands.

Mr. Douglas dealt with an expedition trip made along the little known southwestern shores of Great Slave Lake which he traversed in 1928.

The trip was disappointing from the viewpoint of economic geology, said Mr. Douglas, but it served a purpose inasmuch as it eliminated the necessity of further prospecting in the areas known to be barren of minerals.

The future, however, was bright. With good potash, asbestos, sawmills and paper mills would be a matter of certainty in the near future, he said.

New Scholarships Offered

Acceptance To Be Considered By University Of B.C.

Vancouver.—A \$1,000 scholarship in economics, effective for three years, with a three study trip to the Orient, will be possible for students at the University of British Columbia, through an offer by H. R. Macdonald, a Vancouver exporter. The offer will be considered by the board of governors of the University shortly.

By means of the scholarship Mr. Macdonald hopes to promote the study of Oriental trade and business conditions on the Pacific.

Wants Churchill Site

Winnipeg Man.—The Manitoba government has opened negotiations with Ottawa for taking over the Churchill townsite. Hon. G. M. McKenzie has left for the capital to talk over the question with officials there. He will also visit Toronto to discuss rural hydro electric rates with officers of the Ontario Hydro system.

Radio Helped Unemployed

Berlin.—The first German attempt to employ the unemployed together by radio succeeded beyond hopes of those fostering it. The unemployed employed offices had more jobs than men. In answer to appeal over government radio station for workers, several thousand jobs were filled.

Huge Seizure Of Narcotics

New York.—Narcotics worth \$1,000,000 at the price actually paid, were seized as they were being shipped by express to distributors of the unregulated drug trade in the south and west. Four men, one of them said to be a professional bodyguard to gangsters, were arrested and held in high bail.

Tot Hot In India

London, England.—It is heard here that Lord Burnham, member of Sir John Simon's Royal Commission on Indian statutory reforms, has been overcome by heat and is returning to England from India where the commission has been sitting for some months.

The Interim Pool Payment

(Continued from page 1.)

producing Fifty Million bushels more wheat than last year. It has happened before where over-optimistic leaders of Pool organizations in other countries have gone ahead with liberal early payments, only to find that they were forced to sell heavily on falling markets in order to maintain the required margin which excessive payments had impaired. Should the Canadian Wheat Pool be forced at any time to liquidate any considerable part of their holdings, leaders can well imagine what effect it would have on market levels.

The Pool is functioning splendidly and when the crop season closes our Members will have received the best average price obtainable on the World's markets for their wheat.

Any Delivery Checking Coupons still held by Pool members should be forwarded immediately to Head Office of Wheat Pool, Calgary.

Mr. E. D. Thygesen, who recently purchased the Swartzlander property on Second Avenue, moved into their new home last week.

Here and There

245
In 1921 the Canadian Pacific paid out \$2,000,000 from freight revenue in loss and damage claims. In 1927 it paid \$700,000, a decrease of \$1,300,000, although in the same period the gross freight revenue had increased by \$15,000,000. Better freight handling did it.

The stonework and most of the partitioning of the Royal York Hotel have been completed, and there appears every likelihood that the great building will be open to the travelling public by June 1. This hotel is the largest and tallest in the British Empire.

World's Poultry Congress

Canada To Be Well Represented At

Big Event in London 1930

Canadian poultry breeders will exhibit in the neighborhood of 1,000 birds at the World's poultry Congress to be held at the Crystal Palace, London, in July, 1930, according to P. C. Eiford, Executive Poultry Husbandman and president of the World's Poultry Science Association. Canada will also enter an educational exhibit. Hon. Dr. W. R. Motherwell, Minister of Agriculture, has named an executive committee, composed of the various Provincial Ministers of Agriculture, with H. B. Donovan, internationally-known poultryman, as chairman. There will also be various sub-committees with their respective chairmen.

Examination Of Mine Prospectuses Likely

British Columbia Will Legislate To Protect Investors

Legislation designed to protect investors in British Columbia mines is being introduced in the Provincial Legislature by the Government. It will force all new mining companies to file copies of their prospectuses with the mines department as soon as they are issued so that the department may act immediately against any misleading statements about mineral properties.

The new law is designed to speed up the issuance of official statements and so prevent "wild cat" promotions from obtaining the public's money before they can be quashed.

ABOUT YOUR NERVES

Headaches and Other Troubles Follow When the Nerves

Give Way

Nerves are delicate fibres running all over the body. Some of them give us the sense of touch and feeling; others convey the will to our muscles and enable us to move. When we have a headache or a nervous headache, the body is in some way out of order and the nerves have become over-sensitive so that we get neuritis, nervous headache, sciatica, or some other nerve trouble. Sometimes the nerves get too weak to do the will of the brain, and we get trembling hands or limbs, or perhaps St. Vitus's dance. The whole nervous system is fed and kept healthy by your blood. If that is thin and poor nervous weakness follows. That's why a tonic is needed to build up the blood, so that it can turn feed the nerves, spine and brain. The very best medicine for enriching the blood is Dr. Williams' Pink Pills. You cannot take them without feeling the uplift and give. Your appetite improves your brain is clearer, you feel full of new life. One sufferer, Miss Margaret R. MacDonald, Cataline Road, N.S., tells what this medicine did for her. She says: "I suffered for a long time from severe headache and nervous exhaustion. I tried several kinds of medicine but got no relief until I used Dr. Williams' Pink Pills, and there, before long, gave me complete relief. From my own experience I feel that I cannot praise Dr. Williams' Pink Pills too highly, and would advise anyone who is suffering from headache or nervous exhaustion, to give them a fair trial, as I feel sure the results cannot be anything but satisfactory." Take a pill or a tonic if you are not in the best physical condition. It will help you well and strong. You need, require some day, send for a box from Dr. Williams' Medicine Co., Brockville, Ont.

Asthma No Longer Dreaded. The dread of recurrent attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. It will cure you, not yet learned how safe you are with this preparation and safe you it today and know for yourself.

One of the world's largest dams has been constructed on the Indus river, in India, for irrigation purposes.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

The Japanese alphabet possesses two sets of characters—katakana for the use of men, hiragana for women.

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

At Broussa a Turkish captain has been sentenced to a year's hard labor for opposing the new alphabet introduced by Mustafa Kemal.

Sores Eke From It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. Similarly troubled should use no remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

The first patent for the manufacture of wallpaper was taken out in 1692.

Turkey possesses important forest resources, chiefly in the northern districts of Anatolia.

W. N. W. U. 1770

WORLD HAPPENINGS BRIFLY TOLD

The French Parliament has ratified France's signature to the Kellogg renunciation of war pact by a vote of 570 to 12.

There were 2,300,000 unemployed in Germany on February 15, an increase of 50,000 since the end of January, official figures show.

The year 1928 was a disastrous one for Canadian hail insurance companies, the loss ratio being 100.39 per cent. of the premiums, according to official figures released at Ottawa.

Announcement is made by the Canadian Bank of Commerce that arrangements have been made to open a branch at Port Churchill, Man., the eventual terminus of the Hudson Bay Railway.

France notified the League of Nations that she is in favor of the British proposal for an opium inquiry in the far east by a committee of experts. She will contribute \$5,000 to the expenses of this inquiry.

The question of the provision of a submarine telephone cable between England and the United States, Canada, and Newfoundland, is likely to be a matter of early consideration by the British postal authorities.

Edmond J. Massicotte, well known Canadian artist, died at his home at Saint-Aux-Recollets, Que., after a short illness. He was 53 years of age. Massicotte was known chiefly through his pen and ink sketches of Canadian subjects.

Report of \$100,000,000 now spent in 1928, in grating, track laying, and ballasting on the Canadian National Railway lines according to a report laid in the House of Commons by Hon. Charles Dunning, minister of railways.

Nowly Married Man (tearful and apprehensive): "I wonder what my wife will say when I get home?" His Friend: "When you've been married as long as I have, of man, you'll know beforehand."

Are You Ready?

Nothing more lovely, or any smarter, than this attractive one-piece dress of patterned wool jersey for baby daytime wear. It is cut in such a clever manner that it gives the idea of a hip poke. The patterned section in skirt and jabot front, which is of plain jersey, are only extra parts to pattern, with a striped applied band above plait. Belt of plain jersey slips around. Style No. 353 is designed in sizes 16, 18, 20 years, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust, and is made with 2 1/2 yards of 40-inch material and 5/8 inch of 36-inch contrasting for the 36-inch size. Sheer tulle, bonnet, wool crepe, printed sheer velvet, plain velvet, crepe satin and cotton crepe are becoming fabrics suitable for its development. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap copy carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

When your Children Cry for It

Baby has little upsets at times. All you can cannot prevent them. But you can be prepared. Then you can do what most physicians would tell you to do—give a few drops of plain Castoria. No more done than that. Baby's motherly relief is just a matter of moments. Yet you have seen that child without use of a single doubtful drug. Castoria is vegetable. So it's safe to use as often as an infant has a little pain you cannot put away. And it's always ready for the cramps, pains of colic, or constipation, or diarrhea, effective, too, for sick children. Twenty-five million bottles were bought last year.

SUNDAY SCHOOL LESSON

MARCH 17

THE CHRISTIAN SABBATH

Golden Text: "For the Son of man is Lord even of the sabbath."—Matthew 12:8.

Lesson: Genesis 2:2, 3; Exodus 20:8-11; Matthew 12:1-14; 23:1-10; John 20:19; Acts 20:7; Romans 14:4-6; Revelation 1:10.

Devotional Reading: Psalm 92:1-5, 12, 13.

Explanations and Comments

Reverence the Sabbath, Exodus 20, 8:11—Remember the Sabbath day, to keep it holy: The root meaning of the word rendered "hallowed" in verse 11, is "to separate"; the Sabbath day is to be separated from other days by the way it is spent. Six days shalt thou labor, and do all thy work.

There are many persons whose difficulty in keeping this fourth commandment lies right there—They are too lazy to work the six days. The commandment lays stress upon working as well as upon rest. "Every man is as lazy as he dares to be," is an oft repeated saying which is not without some measure of truth. "Life without industry is sin," declares Ruskin. The tragedy of many a life is that time is not felt to be a trust for whose use he must render account. "The measure of a man—his appropriation of a day. 'You keep the sabbath in imitation of God's rest. Do, by all means of means, and keep also the rest of the week in imitation of God's work.'—Ruskin.

The seventh day is a sabbath unto Jehovah thy God, in it thou shalt not do any work. The seventh day is to be distinguished from other days by the cessation of labor. "The sabbath was made for man, not man for the sabbath," declared the needs of body, mind and spirit, require some day, when we rest for the distinction to be made between the first six days and the seventh, in that God himself labored at creation and rested the seventh day, whereas God hallowed it, separation it from the other days for special holy use.

"The setting apart of one day in seven for rest and worship was due, primarily, to the fact that the human mind will run six days with ease and regularly if it can rest on the seventh day, but it will crack and break if it is pushed to work every day alike. The duty of rest is quite as imperative as the necessity of work. The individual or the nation that disregards this law pays a penalty."—Amory H. Bradford.

Christie's Sultanias

Packed full of plump Smyrna Sultanias, all unbroken, (a Christie special secret) and retaining the natural flavor of fruit fresh from the sunny vineyards. That's just one reason why Christie's Sultanias are so exceptionally delicious.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer. And the sun's rays are the sun's most important light.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary "pink" glass does not allow the passage of Ultra-Violet rays, so that by using glass we are actually excluding the vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-looked-for desire for a material which has conclusively proved that it is a most effective substitute for glass.

Indeed, the use of WINDOLITE has been admitted the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and children and the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

During the last six years completely revolutionary gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light look strong windows for cattle sheds, dairy houses, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and shape. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, nurseries, hot beds, plant coverings and greenhouses. It keeps out cold, draft and crack or drip, with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but a width of 36 inches only. Three square yard of WINDOLITE weighs about 14 cwt., while six square yard of ordinary thickness, weighs about 135 to 150 cwt. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let your PLANTS and

12 ft. Linoleum

We have in stock a pleasing pattern in 12 ft. wide linoleum. This is a convenient and economical size for most rooms and avoids the objectionable "stripping" of joints necessary in laying the smaller widths.

Maintain the Quality Of Alberta's Crops

BETTER SEED

Better Yields Better Grades Better Prices

A special committee appointed by the Minister of Agriculture, with the cooperation of numerous organizations in the province, is urging the use of this spring by farmers throughout the province of

High Quality, Clean, Treated Seed Grains

in order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by:

1. Using registered seed wherever available
2. Using at least high quality commercial seed.
3. Having seed tested for germination and purity.
4. Treating seed for smut.
5. Thoroughly cleaning all grain intended for seed.
6. Seeding only varieties of recognized quality and varieties suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U. P. A. Local, Boards of Trade, the Wheat Pool, Banks, Commercial Grain Firms, the press, and many other organizations are working in co-operation with a—

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers' Association, the Alberta Seed Growers' Association, the C.P.R. Agricultural Department, and the University of Alberta.

D. A. McANNELL,
Provincial Publicity Commissioner, Secretary.

DON'T BLUNDER - USE LUMBER

If you are interested in a new home or building call and see our new house plan books.

Coal and Wood always on hand.

FARM FOR SALE

The Soldier Settlement Board of Canada offers for sale by public tender:

The North Half of Section Thirty five (35), in Township Twenty-six (26), Range Five (5), West of the Fourth Meridian, containing 320 acres, more or less, reserving all mines and minerals.

Terms of sale are not less than 10 per cent of the purchase price in cash on acceptance of the tender, and the balance in ten (10) equal annual instalments, with interest at 6 per cent per annum on the amortization plan.

Each tender must be accompanied by an accepted cheque for \$100. If tender is accepted, this sum will be credited to the purchase price of the land. If tender is not accepted, the money will be returned to the tenderer.

Tenders will be opened at CALGARY, Alberta, on SATURDAY, MARCH 20th, 1920.

The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive offers to purchase until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of the N. 1/2 Sec. 35, W. 4th Meridian". Address tenders and enquiries to—
